## Technical Overview

On a weekly level, NEPSE has breached the weekly support area as well, we do have a constant selling pressure in the market as the festive session is headed on its way. Hope fully the market closes above 2500s area before the holidays for upward continuation right after the market opens after the holidays. Over the market does seems uninterested as the levels have been breached without any significant buying power.

## Weekly analysis

Figure 5 Weekly Time Frame Candlestick Pattern

## Daily analysis

On daily graph,

On a daily spectrum the correction seems to have completed the corrective wave, the index is below the 2500s, yet the chances of upward movement are not that far. If the market does give a good/decent rise once it breaches the downwards trendline, another motive wave, where the index breaches the 3200 further into 3500 is possible. For now, the downward trend line has been an area where a larger selling has been spotted on each test.

Here are some of the zones to watch to determine the direction of the market.

Support	Resistance
Support 1: 2460	Resistance 1: 2570
Support 2: 2440	Resistance 2: 2640
Support 3: 2416	Resistance 3: 2710
